Introduction

Rhode Island Commuting Patterns Census 2000

Based on data collected from Census 2000, *Rhode Island Commuting Patterns* provides journey-to-work statistics for Rhode Island cities and towns. Data is divided into two categories: Where Rhode Island Residents Work and Where Rhode Island Workers Live. Not surprisingly, most Rhode Island residents work in Providence (20.5%). Commuting patterns also supply information on resident outflow to neighboring states for employment. Of all Rhode Island communities, Westerly has the highest percentage (38.1%) of residents who commute to Connecticut for work, while Tiverton has the highest percentage (43.8%) of residents working in Massachusetts.

Rhode Island workers are most likely to live in Providence (13.0%), followed by Warwick (8.7%). There are 38,250 residents from other states who commute into Rhode Island for employment. Westerly attracts the greatest percentage (12.4%) of Connecticut residents into its town for work, while Tiverton draws 28.2 percent of its workforce from Massachusetts.

Rhode Island exports 70,621 residents to other states for work, while Rhode Island imports only 38,250 workers from other states or countries.

Definitions

Commute to work - Includes data on where people work, how they get to work, how long it takes to get from their home to their usual workplace, when they leave home to go to their usual workplace, and carpooling. Data are estimates of people 16 years old and over who were both employed and at work during the reference week (including people in the armed forces).

Income of Families - In compiling statistics on family income, the incomes of all members 15 years old and over in each family are summed and treated as a single amount. Family households include a householder and one or more persons living in the same household who are related to the householder by birth, marriage or adoption. All persons in the household who are related to the householder are regarded as members of his or her family. Not all households contain families since a household may comprise a group of unrelated individuals or one person living alone.

Income of Households - Includes the income of the householder and all other persons 15 years old and over in the household, whether related to the householder or not. Households include all the persons who occupy a housing unit – a house, an apartment, a mobile home, a group of rooms or a single room that is occupied as separate living quarters. Because many households consist of only one person, average household income is usually less than average family income.

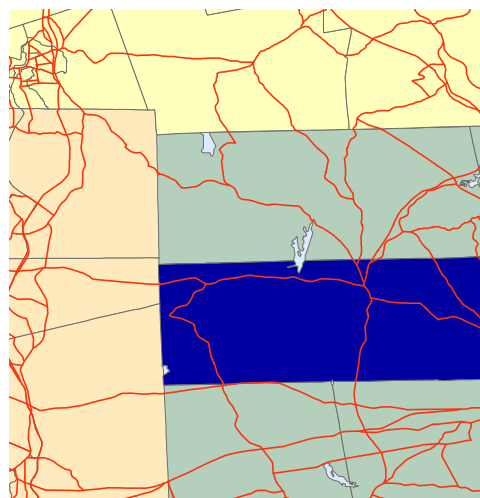

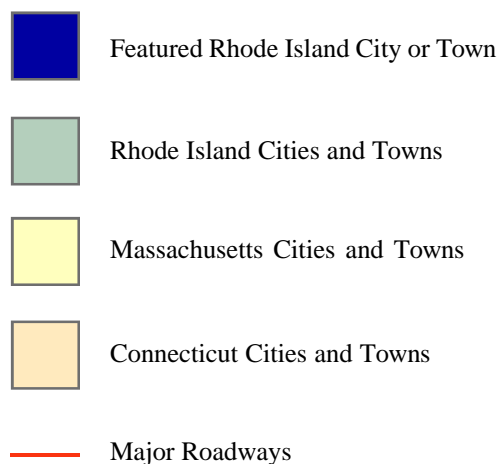

Mean Travel Time to Work - Mean travel time to work is the average travel time in minutes that workers usually took to get from home to work (one way) during the reference week. This is obtained by dividing the total number of minutes taken to get from home to work by the number of workers 16 years old and over who did not work at home. The travel time includes time spent waiting for public transportation, picking up passengers in carpools, and time spent in other activities related to getting to work.

Occupied Housing Unit - A housing unit is classified as occupied if it is the usual place of residence of the person or group of people living in it at the time of enumeration.

Reference Week - The data on employment status and commuting to work are related to a one-week time period, known as the reference week. For each person, this week is the full calendar week, Sunday through Saturday, preceding the date the questionnaire (Census 2000) was completed. This calendar week is not the same for all people since the enumeration was not completed in one week. However, for the majority of people, the reference week for Census 2000 is the week ending with April 1, 2000.

Unemployed - All civilians 16 years old and over were classified as unemployed if they were neither “at work” nor “with a job but not at work” during the reference week, were looking for work during the last four weeks, and were available to start a job. Also included as unemployed were civilians 16 years old and over who: did not work at all during the reference week, were on temporary layoff from a job, had been informed that they would be recalled to work within the next six months or had been given a date to return to work, and were available to return to work during the reference week, except for temporary illness. The unemployment rate is determined by dividing the number unemployed by the civilian labor force.

Map Key

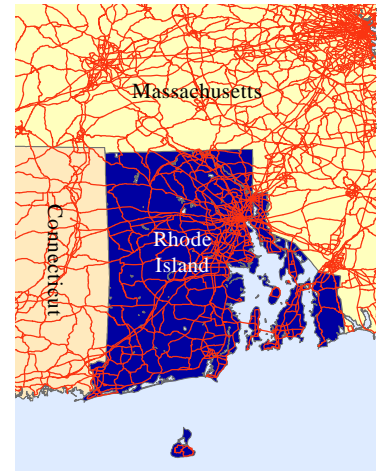

Rhode Island

Rhode Island gained 44,855 (4.5%) residents from 1990 to 2000. During this period, total population grew from 1,003,464 to 1,048,319. According to Census 2000, Rhode Island's unemployment rate was 5.6 percent.

Over a fifth of the state's 490,905 commuters work in the capital city of Providence (20.5%). Massachusetts attracts 11.4 percent of Rhode Island commuters across the state line for employment, while Connecticut draws another 2.3 percent. Resident mean travel time to work is 22.5 minutes and 80.1 percent of commuters drive a personal vehicle alone to work. Of the 408,424 occupied housing units in Rhode Island, 10.9 percent have no vehicle available for transportation, while 52.6 percent have two or more vehicles at their disposal.

According to Census 2000, the Rhode Island median household income was \$42,090, while the median family income was \$52,781 in 1999.

Of the state's 458,534 workers, the highest percentage live in Providence (13.0%), followed by the cities of Warwick (8.7%) and Cranston (7.2%). Nearly 7.0 percent live in Massachusetts.

Barrington

According to Census 2000, this seaside community experienced a 6.1 percent population gain from 1990 to 2000. Barrington added 970 residents for a total population of 16,819. According to Census 2000, Barrington's unemployment rate was 4.0 percent.

Of Barrington's 7,805 commuting residents, most are likely to work in Providence (25.5%) and then in their home town (20.3%). A significant portion (14.8%) of Barrington citizens cross the state line to work in Massachusetts. Resident mean travel time to work is 23.6 minutes and 84.8 percent of commuters drive a personal vehicle alone to work. Only 2.3 percent use public transportation. A majority (52.4%) of the 6,011 occupied housing units in Barrington have two vehicles available for use.

According to Census 2000, Barrington's median household income was \$74,591, while the median family income was \$84,657 in 1999.

The 3,473 Barrington workers are most likely to also live in Barrington (45.6%), followed by Bristol (11.8%). Barrington is able to draw 9.5 percent of its workforce from Massachusetts.

Bristol

The host of the nation's oldest continuing Fourth of July celebration, the Town of Bristol grew by 844 residents (3.9%) from 1990 to 2000. During this period, Bristol's population rose to 22,469. According to Census 2000, this coastal town had a 4.7 percent unemployment rate.

Bristol's 10,895 commuting residents are most likely to work in their own community (35.4%), followed by the neighboring town of Warren (11.0%). Massachusetts is the work destination of 12.4 percent of Bristol citizens. Resident mean travel time to work is 24.0 minutes and 79.5 percent of commuters drive a personal vehicle alone to work. Only 2.7 percent use public transportation. Of the 8,314 occupied housing units in Bristol, 91.8 percent have at least one vehicle available for transportation.

According to Census 2000, Bristol's median household income was \$43,689, while the median family income was \$54,656 in 1999.

The majority of the 7,245 Bristol workers are most likely to also live in Bristol (53.2%), followed by Warren (9.4%). Massachusetts residents comprise 8.6 percent of Bristol's workforce.

Burrillville

This northwestern Rhode Island town lost 434 residents (-2.7%) from 1990 to 2000, reducing its population to 15,796. According to Census 2000, Burrillville had a 4.7 percent unemployment rate.

Although this is the only Rhode Island town bordering two states, Burrillville's 8,288 commuting residents are most likely to work in their own town (23.6%), followed by Providence (11.3%). Massachusetts draws 20.0 percent of Burrillville's citizens into its workforce, while neighboring Connecticut attracts only 1.2 percent. Resident mean travel time to work is 29.8 minutes and 85.6 percent of commuters drive a personal vehicle alone to work.

According to Census 2000, Burrillville's median household income was \$52,587, while the median family income was \$58,979 in 1999.

Of the 3,634 Burrillville workers, the majority are most likely to also live in Burrillville (53.9%), followed by adjacent Gloucester (6.9%). Only 2.7 percent of Burrillville workers reside in Massachusetts and even less live in Connecticut (0.6%).

Central Falls

Rhode Island's smallest city, Central Falls, gained 1,291 (7.3%) residents from 1990 to 2000. During this period, the city's total population reached 18,928. According to Census 2000, Central Falls' unemployment rate was 8.2 percent.

Central Falls' 7,000 commuting residents are most likely to work in neighboring Pawtucket (17.5%), followed by their own home city (14.0%). Massachusetts attracts 18.7 percent of Central Falls' working citizens. Resident mean travel time to work is 20.9 minutes and 62.4 percent of commuters drive a personal vehicle alone to work. Of the 6,696 occupied housing units in Central Falls, over a quarter (25.1%) have no personal vehicle available for use.

According to Census 2000, Central Falls' median household income was \$22,628, while the median family income was \$26,844 in 1999.

Of the 4,430 Central Falls workers, most also live in Central Falls (22.2%), followed by Pawtucket (21.1%). Central Falls draws 6.9 percent of its workers from Massachusetts.

Charlestown

This southern Rhode Island coastal town grew by 1,381 (21.3%) residents from 1990 to 2000. During this period, total population rose to 7,859. According to Census 2000, Charlestown had a 2.4 percent unemployment rate.

Of Charlestown's 4,034 commuting residents, a large portion are likely to work in nearby South Kingstown (18.6%), followed by their own home town (15.9%). Resident mean travel time to work is 27.4 minutes and 84.2 percent of commuters drive a personal vehicle alone to work. Very few (0.5%) use public transportation. Of the 3,178 occupied housing units in Charlestown, almost half (49.6%) have two personal vehicles available for transportation.

According to Census 2000, Charlestown's median household income was \$51,491, while the median family income was \$56,866 in 1999.

Of the 1,761 Charlestown workers, most are likely to also live in Charlestown (36.3%), followed by South Kingstown (14.0%). Charlestown imports only 1.4 percent of its workers from Connecticut, compared to the 14.1 percent of Charlestown citizens who work in Connecticut.

Coventry

Coventry, which is Rhode Island's largest community in area covering 64.8 square miles, grew by 2,585 (8.3%) residents from 1990 to 2000. During this period, total population reached 33,668. According to Census 2000, 3.7 percent of Coventry's labor force was unemployed.

Of Coventry's 17,370 commuting residents, more than 1 in 5 (21.0%) were likely to work in Warwick, followed by their own home town (19.7%). Resident mean travel time to work is 24.8 minutes and 88.1 percent of commuters drive a personal vehicle alone to work. Of the 12,597 occupied housing units in Coventry, 68.2 percent have at least two vehicles available for use.

According to Census 2000, Coventry's median household income was \$51,987, while the median family income was \$60,315 in 1999.

Of the 7,518 Coventry workers, most also live in Coventry (45.6%), followed by nearby West Warwick (13.3%). Even though Coventry borders Connecticut, few residents travel across the state line to work in Connecticut (2.1%) or come into Coventry from Connecticut for employment (1.1%).
